

**BIOL131 - Introduction to Human Disease**

This exam is designed to assess knowledge of basic human pathophysiological mechanisms, including infection, inflammation, neoplasia, malnutrition, genetic defects and aging. Questions relating to the etiology, presentation, evaluation, treatment, and prevention of common human diseases are covered in this exam. This is a timed test. Students have 90 minutes to take this exam. Students need only a pencil; no scrap paper is necessary. The use of textbooks, notes, dictionary, or any other means of information is not allowed.

-----

Minimum Passing Score: 80%

DU competency exams satisfy requirements at DU but are not transferable to other educational institutions. Students may not take this test if they have previously taken this course or received a failing grade in the course. The test may only be taken one time.
