

HLTH 220 Pharmacology Competency Exam

Eligibility:

A student may not take this exam if they have already failed HLTH220

Description:

The credit by exam for HLTH220, Pharmacology evaluates the understanding of basic pharmacology and its effects on the human body's systems and the diseases of the human body. The different drug classifications with the possible side effects and the principles of the different drug actions are necessary.

Topics Include:

- Legal constraints of medication administration
- Safety "rights" of medication administration
- Appropriate medication dosage calculations

Measurement:

- Summative exam
- Exam to include true/false, multiple choice, matching

Administration:

The student is not allowed any resource materials (textbooks, notes, dictionaries, etc.) This is a timed test. They have 2 hours to complete the test.

Evaluation:

The exams should be evaluated by the local allied health department coordinator, or, if that is not possible, by the associate dean. They should be evaluated in as timely a manner as possible.

Students only receive a passing (80% or above) or failing evaluation.
