

Technology Project Management

Bachelor of Science

Hit the ground running in a high-demand field with opportunities for long-term professional growth and strong starting salaries. This program prepares you to take leadership roles in project management and resource planning in a variety of industries. Join professionals in high-growth industries such as information technology, health care and supply chain management.

In this program, learn to plan, manage and implement business and technology projects. Course work integrates accounting, finance, production, computer networking and computer information systems with in-depth project management practices providing you with the well-rounded skills necessary for professional success.

A BS degree in Technology Project Management can be completed in-seat or online.

Why DU?

- 100% of our Technology Project Management students participate in an internship, providing valuable, employment-ready experience.
- Our hands-on learning environment challenges you to solve technical problems using state-of-the-art technology. As a result, you develop high-level proficiencies that create an immediate impact in your new career.
- Transfer-friendly, allowing for many community college, college-level, and in some cases, high school courses to transfer so students can graduate sooner.
- All upper level courses are taught by Project Management Professional (PMP)[®] to ensure you are learning the most current and recognized industry skills.

Project Management Professional (PMP) is a registered trademark of the Project Management Institute, Inc.

Davenport University
