Computer Information Systems Certificate

18 CREDITS

Foster your natural talents in software development

Are you fascinated by programming languages and applications? Do you have an aptitude for software development? Then you're a prime candidate for Davenport University's Computer Information Systems Certificate program.

Our Computer Information Systems Certificate program will prepare you for an in-demand career in computer information systems, starting as an entry-level application developer or junior programmer.

What's more, this program includes sitting for up to three industry certification exams, boosting your qualifications and your resume.

With the foundational knowledge a Computer Information Systems Certificate provides, you can start building your portfolio with hands-on work and prepare to pursue a degree related to computer information systems.

What you can do with this certificate

After completing this program, you'll be proficient in object-oriented software development and qualified for in-demand jobs as a junior programmer and more. You can specialize in in-demand programming languages, such as C#, JavaScript and Oracle Java.

It also provides you with career credentials that will pave the way to a more advanced degree, like an associate, bachelor's or master's program.

Is this career right for you?

If you're organized and systematic, and have an analytical mind, you will likely excel in this field. A job in IT may require you to work with minimal supervision when building and maintaining hardware, networks and systems. You must be able to stay abreast of current and emerging technologies.
