

Networking Technology Certificate

COLLEGE OF TECHNOLOGY

18 CREDITS

Develop your fascination with technology

Do you have an appetite for technology? Do you enjoy solving problems, managing applications, and improving connectivity? Then you're the ideal candidate to earn a Networking Technology Certificate.

A Networking Technology Certificate prepares you to begin your IT career with jobs like junior systems administrator or network technical specialist.

You'll build your hands-on skills and create an impressive portfolio to help you succeed both professionally and academically. You'll finish this program with the skills needed for in-demand IT jobs, a portfolio of relevant work, and the foundational knowledge to pursue an advanced computer networking degree in Davenport University's associate, bachelor's or master's programs.

What you can do with this certificate

A Networking Technology Certificate enables you to jump into the in-demand field of networking technology. After earning your Network Technology Certificate from Davenport, you'll be able to perform end-user support, application management, support ticket triage, remote user support and more.

Is this career right for you?

As a networking tech, you should be able to pivot quickly and easily from building and maintaining hardware to writing code and creating wireless networks. You must be able to stay abreast of current and emerging technologies.
