

Master of Science in Occupational Therapy

COLLEGE OF HEALTH PROFESSIONS

Fast-Track Your OT Degree

Davenport University's Master of Science in Occupational Therapy (MSOT) program is designed with your busy life in mind. We know that balancing family, work and school can be challenging, so our program is tailored to help you earn your degree and enter the workforce in as little as 24 months. Our redesigned program reduces the number of credits required from 78 to 67. This streamlined curriculum means you can focus on advancing your career sooner. Plus, no GRE is required for admission, allowing you to prioritize what truly matters — developing the skills and knowledge to make a difference in people's lives.

Our MSOT program combines a strong foundation in practical, evidence-based methods with specialized training in areas like anatomy, sensory and motor disruption, mental health and research. You'll gain hands-on experience in our state-of-the-art occupational therapy lab at the Grand Rapids Lettinga campus, where you can apply your skills in a real-world setting under the guidance of experienced, credentialed faculty. This adaptive lab, along with other immersive learning opportunities, ensures you graduate ready to meet the needs of diverse patient populations.

As a graduate of Davenport's MSOT program, you'll be equipped to help individuals adapt to challenges that impact their daily lives, whether in rehabilitation, mental health, neurological science or community settings.

Once you complete the program and pass the National Board for Certification in Occupational Therapy (NBCOT) exam, you'll be prepared to work in various roles — from acute care and home health to schools and assisted living environments. And with the program's accreditation from the Accreditation Council for Occupational Therapy Education (ACOTE), you can trust that your education meets the highest industry standards.

Experience the Davenport difference:

- Complete your degree in OT in just 24 months.
- Learn from credentialed faculty who have diverse backgrounds with real-world experience.
- Prepare for industry exams.
- Take Davenport's Entering the Profession course to experience mock exams and remediate practice after your final fieldwork.

Master of Science in Occupational Therapy (67 credits)

davenport.edu/msot

Develop and deepen your occupational therapist skillset with classes in anatomy, sensory and motor disruption, research, mental health and more. Then practice what you've learned in your schooling for occupational therapy in our occupational therapy adaptive lab and through a variety of other hands-on opportunities.

Health and Human Service Case Management, BS / Occupational Therapy, MS (168 credits)

davenport.edu/HHCMtoOT

Accelerate your college education and start your career sooner with our Health and Human Service Case Management to occupational therapy degree pathway. Complete both an undergraduate and graduate degree in just five years — a year sooner than Davenport's traditional occupational therapy accredited program. Davenport's expedited pathway will save you time — and money — so you can begin your career in occupational therapy one year earlier.
